Our Power for Your Choices

Lights for The Ridges Subdivision in North Hudson

Poles	\$390 per pole X 3	= \$1,170
S&H		= \$225
Lights	\$350 per Light X 4	= \$1,400
No S&H for 4 or more lights		
One light is bad in the Ridges		
Deliver and Set charges for poles		= \$855
Replace 1 light that is bad		= \$100
Total Cost		= \$3,750

This price includes setting 3 new poles, installing 3 lights on these poles and changing out one bad fixture. We would run the wire down the pole to the inspection hole at waist level on the pole. Your electrician would be responsible for running the wire from the nearest transformer, with a fused disconnect switch over to the light pole and connecting the wires to energize the lights. If a transformer needs to be installed or a service extension needs to be made, those costs will be given in a separate estimate.
