Submitted by Mark Ekblad Public Works Director

Issue

Metrotech Locator Purchase.

Background / Current Information

- The current locator we use to mark the locations of watermains and services belongs to the Hudson Water Utility. The City of Hudson let us keep the locator in the Village after the utility purchased new locators a couple of years ago.
- Due to the age of the current Radiodetection Locator, we can no longer find anyone to service it.
- My staff and I have tried different locators and we all feel the Metrotech 9800 Locator from Ferguson Waterworks would be the best option for the Village.
- The cost of the Metrotech Locator would come out of the 220 Water Maintenance Fund.

Recommendation:

Recommend the purchase of the Metrotech 9800 Locator from Ferguson Waterworks at a cost not to exceed \$4,135.00.

Suggested Motions:

Public Works:

Recommend the purchase of the Metrotech 9800 Locator from Ferguson Waterworks at a cost not to exceed \$4,135.00.

Finance / Board:

Move to purchase the Metrotech 9800 Locator from Ferguson Waterworks at a cost not to exceed \$4,135.00.

Description Metrotech Vivax 9800 Kit

vLoc-9800 Kit includes 9800 Receiver, 5 Watt Transmitter, Connection leads, Ground stake, Receiver Bag, Transmitter Bag and Manuals

The vLoc-9800 is a new addition to the vLoc range, it builds on the Metrotech tradition of performance and simplicity – the vLoc-9800 features includes:

- Color display
- Automatic and manual gain options
- Distance Sensitive Left/Right Guidance™
- Pushbutton depth & current
- Simple user interface
- vLoc Series 2 enhanced battery life
- Sheath fault location (option)

Distance Sensitive Left/Right Guidance™ – Pioneered by Metrotech thirty years ago - this is the standard method of locating in many industries. Most manufacturers provide left/right indication using a peak/null antenna set. Metrotech product and now the vLoc-9800 uses two horizontal guidance antennas some distance apart. This provides very accurate left/right separation – that, together with an exceptionally high level of sensitivity, produces a crisp, fast, accurate response... and an easier locate.

Typical applications:

Pipe Locating, Cable Locating, Sonde Locating, Fiber Optic Line Locating
