Hi Patrick!

Thank you for your time today on the phone and information. I look forward to putting the bid together for the 2020 construction season.

Per our spray patch conversation:

Estimate: \$500 per hour. Typically 30-40 patches per hour.

If you want to go over some areas for patching, please let me know. I live close and can come out on short notice when it works best for you.

Have a great weekend and talk soon!

Thanks,

Melissa Thomas

The prices listed below are general budget figures for you to use as a guide.

We will have better knowledge for our estimates the first part of April.

Please note that filling out this form in no way obligates you for this year. It is a rough estimate that will be used for us to make sure we have the materials needed on hand. These materials are strategically placed in certain areas to lessen hauling costs to you. Widening/Wedging/Reconstruction may be required to accept desired pavement & shoulder width (cost dependent upon scope).

Town/City/Village = _____

Blacktop: 22' wide x 2.5" thick - \$125,000 per mile _____ miles
(Includes milling, prep., signing, & 2' wide gravel shoulders)

Seal Coat: 22' - \$16,000 per mile _____ miles
(Crack filling and/or spray patching is recommended prior to seal coat)

Add Gravel Base: 2" - \$17,000 per mile _____ miles
3" - \$25,000 per mile _____ miles

Crack Fill: \$4,000 per day _____
